THE STATS...

- **20 YEARS:** Time that the reptile section has been the fastest growing part of the industry.
- **300 MILLION:** Value of the UK reptile pet trade.
- **1500:** Number of UK stores selling reptile pets.
- **20 MILLION:** Number of crickets produced in the UK each year for reptile live food.
- **10 MILLION:** Number of locusts produced in the UK each year for reptile live food.
- **2 TONNES:** Amount of meal worms produced in the UK each year for reptile live food.
- **1 MILLION:** Number of frozen mice sold each week for snake food.
- **OVER 2500:** Number of reptile vivariums sold each week.
- **1:** Number of phone calls required to secure your slice of the profits.

* Statistics courtesy of the Federation of British Herpetologists and The Reptile and Exotic Pet Trade Association.

WELCOME

WELCOME TO KOMODO AND THE WORLD OF FASCINATION AND UNUSUAL PETS.

Reptile pet keeping is more popular than ever. Recent research* shows that there are now probably more reptile pets in the UK than there are dogs, with around 8 million reptiles in over a million households. As reptiles keeping goes mainstream around the world, it is no surprise that more and more pet stores are catering for this growing industry sector.

Komodo reptile products are proven to perform:

FOR REPTILES:

reliable products to provide habitat enrichment and welfare benefits.

FOR KEEPERS:

equipment that looks great, is easy to install and simple to use.

FOR RETAILERS:

boosts profits with our comprehensive range of Komodo products to cater for hobbyists of all levels.

OUR COMMITMENT:

We're proud of our commitment to improving reptile pet care. We work hard to improve the standards and provide greater benefits at every stage of the pet keeping process; from the development of our product range and our service to retailers to consumer satisfaction and improvements in reptile welfare. It's important to us because we care.

TORTOISE DIET

Every product in the Komodo range of reptile foods and supplements has been specially formulated to provide the right balance of nutrients.

Komodo tortoise diets are designed to provide a complete nutritional diet for popular species of pet tortoise. The diet is high in fibre with a calcium to phosphorus ratio of 3:5:1.

Our tortoise diets have been extensively tested to develop a range of flavours that tortoises love: Banana, Fruit & Flower, Cucumber, Dandelion and Salad Mix.

Pack Size: Individual

CALCIUM JELLY POTS

High quality food for Feeder Insects

Feeding live food or 'Gut Loading' is an important aspect of keeping any insectivorous reptile and Komodo's Calcium Jelly provides an extra calcium boost for all types of feeder insect. Used as part of a balanced diet, the convenient pot can simply be placed within the live foods enclosure helping to keep them healthy which in turn provides your reptile with nutrient-packed insects. Can also be used as an occasional treat for nectar or fruit eating reptiles.

SUBSTRATES

All Komodo's natural substrates aid in the establishment of the correct environment for a reptile or amphibian and come from 100% renewable sources.

Creating the correct environment for an individual species is vital for promoting their natural behaviour. Whether they require an environment which is arboreal, terrestrial, burrowing or they need humid or dry habitat, Komodo substrates have been chosen with a specific species needs in mind.

HABITAT MOSS

Code: 83003 1.5L (22x24cm)
 Code: 83004 3L (28x29cm)
 Pack Size: Individual

Komodo's Habitat Moss is natural, locally sourced Sphagnum Moss. Brilliant for providing humidity within a set up, it provides an ideal substrate to aid with reptiles shedding skin and creating a natural environment.

FINE ORCHID BARK FOREST TERRAIN

Code: 83006 6L (30x40cm)
 Code: 83007 12L (34x46cm)
 Code: 83008 24L (50x42cm)
 Pack Size: Individual

Komodo's Orchid Bark Forest Terrain is the perfect substrate for forest and tropical set ups and can be used for wet or dry environments. This natural bark chippings substrate is sourced from a 100% organic renewable resource.

TORTOISE ECO TERRAIN

Code: 83020 10L (38x43cm)
 Pack Size: Individual

Tortoise Eco Terrain has been created to meet the flooring needs of Mediterranean, Russian and other species of tortoises found in arid environments. This substrate helps to replicate the terrain found in their natural environment and a deep layer of Tortoise Eco Terrain aids in allowing tortoises to carry out normal burrowing behaviour.

CACO³ SAND

Made from 100% Calcium Carbonate, CaCo³ sand has been developed to provide a safe and hygienic terrain for many desert dwelling reptiles. Designed to be digestible if inadvertently swallowed it reduces the risk of impaction in a reptile. Available in a wide range of colours, it is ideal for achieving anything from a natural set-up to a vibrant enclosure.

CACO CARAMEL 4KG

HUMIDITY

Simulates rain, increases humidity and allows reproduction of a tropical rainforest environment

Dry-Run Protection safely turns the fogger off

FOGGER EU PLUG

Code: 82362
Size: 21x18x27cm
Pack Size: Individual

ADJUSTABLE RAINFALL SYSTEM- EU PLUG

Code: 82364
Size: 28x28x45cm
Pack Size: Individual

Provides a continuous drinking station for chameleons, gecko

Increases overall habitat humidity

Recycled material

REPTILE CARPET

Code: 83028 60x50cm
Code: 83029 120x60cm
Pack Size: Individual

Komodo Reptile Carpet is soft substrate that can be used with snakes, lizards, amphibians, tortoises and terrestrial turtles. Its absorbent soft surface is kind to the soft belly of your reptile. The carpet is easy to use and can be cut to fit any terrarium or habitat size. Simply rinse clean when soiled or replace when necessary.

REPTILE DRINKING FOUNTAIN & HUMIDIFIER EU PLUG

Code: 82366
Size: 12x12x48cm
Pack Size: Individual

LIGHTING

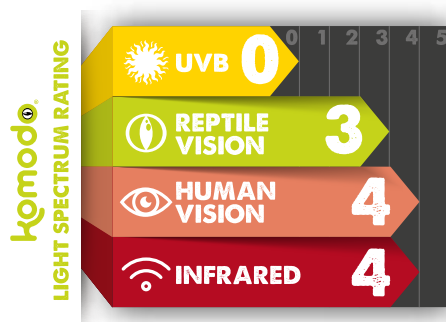

NEODYMIUM DAYLIGHT BULB

A daylight lamp for reptiles.

Daylight Spot Bulbs are produced using glass that has been impregnated with a type of 'rare earth' known as neodymium, which gives the glass a blue hue. When neodymium is present in the glass of a spot bulb it filters out yellow light produced by normal spot bulbs, this then creates a whiter light that is more natural in appearance.

Neodymium filtered light can also enhance the appearance of greens and reds within an enclosure.

- Neodymium coating reduces yellow for a whiter daytime light
- Emits up to 90% of power as beneficial warming infrared rays
- Optimum heat source of efficient thermoregulation & metabolism
- Moderate output of UVA rays stimulate appetite and the immune system

Daylight Bulb Screw

50w Code: 82210 Size: 6.5x10.5x6.5cm

75W Code: 82211 Size: 6.5x10.5x6.5cm

100W Code: 82212 Size: 9x12x9cm

150W Code: 82213 Size: 10x15x10cm

INFRARED SPOT BULB

The ideal 24 hour infrared heat source for reptiles.

Great for daytime and night time, providing the same heat output with more subtle lighting shade. The ideal 24 hour infrared heat source for reptiles.

- Soft red light for restful heating
- Emits up to 90% of power as beneficial infrared rays
- Optimum heat source of efficient thermoregulation & metabolism
- Moderate output of UVA rays stimulate appetite and the immune system
- Can be thermostatically controlled for safer use

Infrared Spot Bulb Screw

50w Code: 82220 Size: 6.5x10.5x6.5cm

75W Code: 82221 Size: 6.5x10.5x6.5cm

100W Code: 82222 Size: 9x12x9cm

LIGHTING

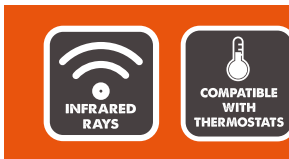

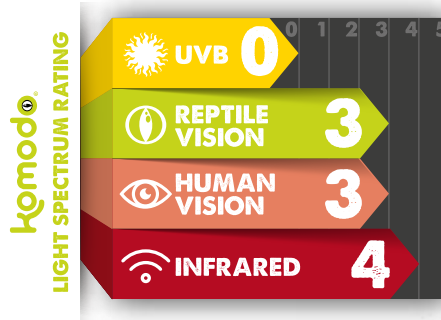

BASKING SPOT BULB

A specially designed basking lamp, ideal for tropical and desert species.

Komodo Basking Spot Bulbs provide a perfect heating and lighting source for any diurnal species of reptile, amphibian or invertebrate.

90% of the energy used by this bulb is emitted as beneficial warming infrared rays, efficiently directing heat at the desired basking location providing optimal thermoregulation within your animal.

- Focused beam directs heat efficiently towards the basking site
- Emits up to 90% of power as beneficial infrared heat rays
- Optimum heat source for efficient thermoregulation & metabolism
- Moderate output of UVA rays stimulate appetite and the immune system
- Can be thermostatically controlled for safer use

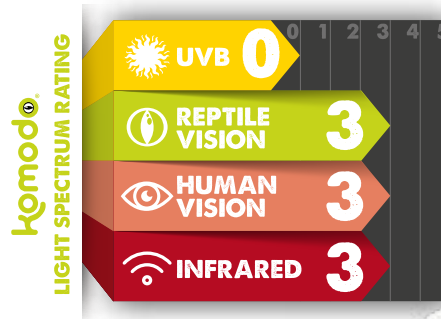

Basking Spot Bulb Screw
 50w Code: 82230 Size: 6.5x10.5x6.5cm
 75w Code: 82231 Size: 6.5x10.5x6.5cm
 100w Code: 82232 Size: 9x12x9cm

HALOGEN SPOT BULB

Ideal for sun-loving diurnal species that are active during the day.

Provides more heat and a more intense white light for a high intensity sunspot

- Produces more intense IRA heat rays
- Provides a hot white light for brighter, warmer day times
- High efficient- longer life & less power consumption
- Emits up to 90% of power as beneficial intense infrared rays
- Optimum heat source for efficient thermoregulation & metabolism
- Good output of UVA rays stimulates appetite and the immune system
- Can be thermostatically controlled for safer use

Halogen Spot Bulb Screw
 35w Code: 82240 Size: 6.5x10.5x6.5cm
 50w Code: 82241 Size: 7x8.5x7cm
 75w Code: 82242 Size: 9x12x9cm
 100w Code: 82243 Size: 10x13x10cm

LIGHTING

COMPACT LAMPS

Compact lamps are suitable for smaller species. If the animal's entire body will not fit in the beam a tube is more appropriate form of lighting.

- Compact design saves space & energy
- Energy & light efficient, less power demand than tubes
- E27 screw cap fitting. No ballast required, use horizontally.

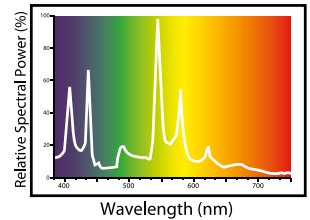

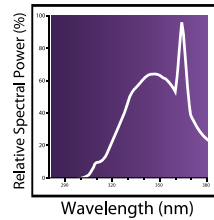

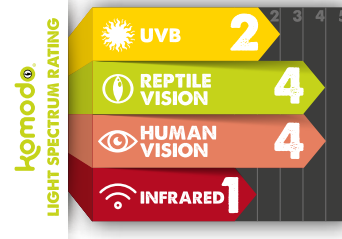

NATURAL SUNLIGHT 2% UVB

For fuller spectrum daytime light

- Ideal for reptiles not requiring high levels of UVB
- High output of UVA rays promotes vision, appetite and the immune system
- UVB enables production of vitamin D3 for healthy bones
- Bright, cool, white light output, with excellent colour rendition

Compact Lamp UVB 2%
Code: 82270 15w UVB 2.0
Code: 82271 26w UVB 2.0
Size: 7x15x7cm

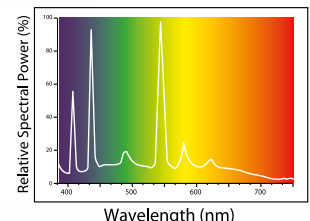

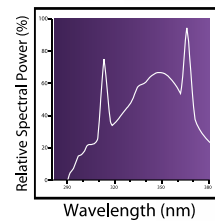

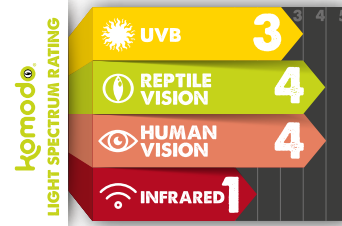

FOREST SUNLIGHT 5% UVB

For forest and shade reptile species

- For reptiles requiring moderate levels of UVB
- High levels of UVA rays promotes vision, appetite and the immune system
- UVB enables production of vitamin D3 for healthy bones
- Bright, cool, white light output with excellent colour rendition

Compact Lamp UVB 5%
Code: 82272 15w UVB 5.0
Code: 82273 26w UVB 5.0
Size: 7x15x7cm

LIGHTING

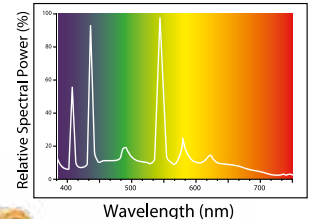

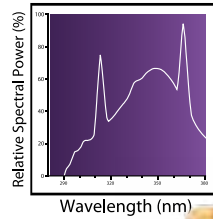

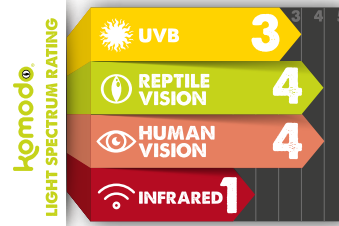

DESERT SUN 10% UVB

For desert reptile species exposed to strong sunlight

- For reptiles requiring higher levels of UVB
- High levels of UVA rays promotes vision, appetite and the immune system
- UVB enables production of vitamin D3 for healthy bones
- Cool white light output with excellent colour rendition

Compact Lamp UVB 10%
Code: 82274 15w UVB 10.0
Code: 82275 26w UVB 10.0
 Size: 7x15x7cm

SOLAR D3 UV BASKING BULB

Ideal for Tropical & Desert Reptiles

The Komodo Solar D3 UV Basking Bulb provides strong amount of UVA, UVB, visible light and heat in a single lamp. Excellent for species with are Open or Partial sun baskers (Zone 3) and Mid-day sun baskers (Zone 4). Useful in large enclosures for occasional baskers (Zone 2). Perfect for naturalistic habitats where animals can photoregulate and thermoregulate to their individual needs.

- Aids in the prevention of MBD
- Contributes to overall health and well-being
- Delivers UVA, UVB, light and heat
- Enable Vitamin D3 uptake
- Mercury Vapour lamp technology
- Stimulates natural sunlight

LIGHTING & HEATING FIXTURES

DOME CLAMP LAMP FIXTURE

The Dome Clamp Lamp fixture is a highly reflective aluminium dome which increases UVB and UVA output. Suitable for use with all E27 screw lamps and heat emitters the multi directional clamp fits in corners and helps to flexibly direct heat and light. Contains a heat resistant ceramic fitting.

- Versatile multi-directional pivoting clamp
- Heat resistant ceramic screw-fit lamp holder
- Reflective aluminium dome maximises UVB output
- Suitable for screw fit bulbs up to 60W (14cm) and 150W (21cm)

 Black Dome Clamp Lamp Fixtures EU Plug
Code: 82301E (14cm)
Code: 82302E (21cm)

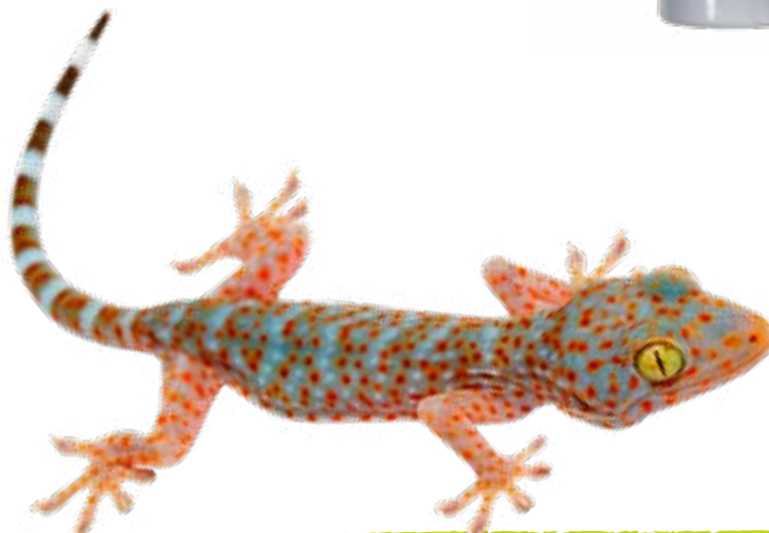

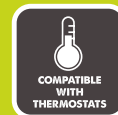

Versatile multi-directional pivoting clamp

CERAMIC ES LAMP FIXTURE & MOUNTING BRACKET

Easily mountable, this heat resistant ceramic lamp fixture is suitable for various enclosures and for use with most E27 screw cap heat and light sources up to 200W.

- Sturdy, coated metal mounting bracket
- For use with all Komodo screw fit heating and lighting bulbs up to 200W
- Heat and UV resistant for longer life
- Long 170cm cable with switch
- Easy to fit with 4x mounting apertures

 Ceramic ES Lamp Fixture & Mounting Bracket EU Plug
Code: 82303E
Size: 10.5x10x6cm
Plug Cable Size: 172cm

LIGHTING & HEATING FIXTURES

DEEP REFLECTOR DOME

Light and heat reflecting metal dome.

The Komodo Deep Reflector Dome has a highly reflective interior which maximises UVA and UVB light and focuses heat directly into a reptile, amphibian or insects habitat. The heat and UV resistant ceramic fitting is perfect for mercury vapour, compact and incandescent lamps as well as ceramic heaters up to 200W and is ideal for tortoise tables, mesh top glass terrariums or larger wooden vivariums. Comes complete with on/off switch and fixing clamp.

- Maximises UVA and UVB light
- Focuses heat directly into the habitat
- For use with all E27 screw lamps and heat emitters up to 200w

Deep Reflector Dome EU Plug

200w Code: 82333E

Size: 22x21x21cm

Plug Cable Size: 172cm

Perfect for mercury vapour, compact and incandescent lamps as well as ceramic heaters

ALUMINIUM REFLECTOR DOME

Light and heat reflecting metal dome.

The Komodo Aluminium Reflector Dome is highly reflective which maximises UVA and UVB light and focuses heat directly into a reptile, amphibian or insects habitat. The heat and UV resistant ceramic fitting is perfect for mercury vapour, compact and incandescent lamps as well as ceramic heaters up to 150W and is ideal for tortoise tables and mesh top glass terrariums. Comes complete with an on/off switch and fixing clamp.

- Maximises UVA and UVB light
- Focuses heat directly into the habitat
- For use with all E27 screw lamps and heat emitters up to 150w

Aluminium Reflector Dome EU Plug

60w Code: 82337E (18x14x14cm)

150w Code: 82338E (19x21x21cm)

Plug Cable Size: 172cm

Perfect for use with Komodo Terrariums, its small size fits neatly on the top screen cover.

HEATING & THERMOSTATS

THE ADVANCED HEAT MATS

The perfect choice for gentle heat

Komodo Advanced Heat Mats are made in the UK to the highest safety standards and are an excellent source of 24-hour heat to thoroughly warm a reptile from scale to bone. Advanced Heat Mats can be used as a sole source of heat for some reptile species, or in conjunction with another heat source.

- Ideal for providing gentle heat for species that don't need high temperatures
- Great for providing cooler night-time temperatures
- Heat mats emit no light so ideal for vivariums in bedrooms
- Available in a wide range of sizes suitable for most enclosures
- Complete with a two year guarantee

Advanced Heat Mat Euro Plug

7w Code: 82341E (9.5x14.5cm)

15w Code: 82342E (14x27cm)

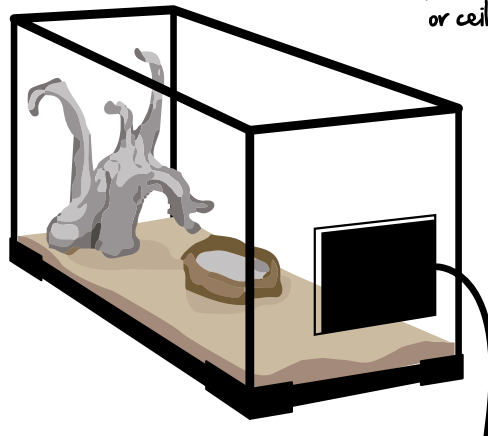

22w Code: 82343E (27.5x27.5cm)

30w Code: 82344E (57x27.5cm)

39w Code: 82345E (73x27.5cm)

Place the heat mat into your preferred position within the terrarium (back wall, side wall or ceiling)

SAFETY NOTE:

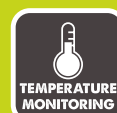

Komodo recommend that the advanced heat mat range should be used in conjunction with an appropriate thermostat. When using a thermostat with a heat mat, please make sure that the probe is in contact with the heat mat at all times.

ON / OFF THERMOSTATS

Precision is paramount when using any thermostatically controlled heat source, and our On/Off Thermostats are guaranteed to maintain the required temperature to within 1 degree celsius from around the probe. Using a Komodo Thermostat will give every user peace of mind that their reptile is in a comfortable and controlled environment.

How they work: On/Off stats are the least expensive and the most basic thermostat in the Komodo range and they regulate the temperature by switching the heater on and off. If the sensor reads a temperature that is too warm, it switches the heater off. Too cold, it switches the heater on.

Ideal For: We recommend the use of the 100W Thermostat with our **Advanced Heat Mats**, whilst the 300W Thermostat can be used with any of our incandescent **Spotlight Bulbs**.

DECOR

The Komodo range provides an extensive choice of heavy duty resin hides with a natural finish, catering for many species. Suitable from hatchling to adult.

The importance of a dedicated hiding area for many species should never be underestimated; it can be key to maintaining a healthy, calm, reptile. Lack of a sheltered hiding space can lead to stress which in turn can be detrimental to a reptiles appetite and activity levels.
